Please note: as each piece of natural stone is unique, differences in tone, veining & colour for example, may occur.

Choosing the right fireplace

A fireplace becomes the focal point of any room, so choosing the right fireplace is essential in creating an atmosphere of warmth and style in your home. With a wealth of experience in fireplace design and manufacture, we are passionate about our expertly crafted fireplaces and offer an extensive range of traditional and contemporary fireplaces in a range of finishes. When choosing your fireplace, there are a number of considerations to take into account.

CONSIDERATIONS

- *The type of heating system: solid fuel, gas or electric*
- *The overall look you wish to achieve: traditional vs contemporary*
- *The available width and height for the fireplace*
- *The type of material you wish to choose*
- *The care and maintenance required*

Caring for your fireplace

Natural stones, marbles and granites are materials naturally formed over millions of years. They have very individual features and characteristics. Each piece is hand crafted to show these natural materials at their best and will form the centrepiece in your home.

Your fireplace surface requires a minimum of maintenance to keep it looking as good as new. Dust down regularly with a soft, clean brush and occasionally wipe over with a damp cloth. Consideration should be given to the placement of heavy ornaments. As with all natural materials, exposed areas may fade in strong sunlight. Your natural stone fireplace is quite durable and has been treated with a sealer to help protect and maintain the surface. In the event of an accident, soak up spillages immediately. Buff with a soft, dry cloth. In the event of staining, contact your local stone mason for a specialist cleaning kit.

Size: 260mm wide x 190mm high

All dimensions are in mm unless otherwise stated. Dimensions are approximate and are subject to change without prior notice. Disclaimer: Stove Chambers only suitable up to 5kW. To be fitted against a concrete wall.

SKAMOLEX PANELS

Skamolex panels are ideally suited for lining stoves, fireplaces and gas fires and are capable of withstanding temperatures of up to 1100ºC. They are made from exfoliated vermiculite and are non-irritant, odourless and clean to handle.

BENEFITS

- High insulation capacity = better performing stove
- Environmentally friendly - better combustion + cleaner waste gasses
- Ideal for fire chambers and inglenooks
- Ideal as a heat shield above a free standing stove
- Easy to use and cut to required size)

PANEL DESIGNS

Skamolex panels are available in six standard patterns, ranging from traditional masonry look to three designs matching the trends of current fires and stoves.

Available in:

- 1000 x 610 x 25 mm (brick, ribbed portrait, ribbed landscape)
- 1000 x 610 x 25 mm (plain)
- 1000 x 1260 x 25 mm (plain, brickwall)
- 1000 x 610 x 25 mm VIP – 900 Plain Skamolex

(Ideal for replacing internal stoveboards)

Loose Vermiculite - loose fill insulation

Available in 100 litre bags

Fire Classification	A1 non-combustible, no flame
Max Service Temperature	1000˚C
Thermal Conductivity	0.06W/mK at 200˚C
Compressive Strength	2.6N/mm2
Bulk Density	225kg/m2

Brickwall

Rib – available in portrait or landscape
